

WHAT WE DO

Ampisafe introduces a product to deliver a safe and sterile method of extracting the contents from an ampule. Its design ensures clear visibility of the label, eliminates the risk of needle stick injuries, keeping all persons protected.

Our product is proudly Australian owned and manufactured to the highest quality and standards.

WHO ARE WE

Ampisafe is designed and made by a health professional, for the safety of all health professionals. Our goal is to provide a unique, simple and effective device that leads the way in safe and sterile delivery of ampule contents.

WHY AMPISAFE

-  Reduces needle stick injuries
-  Ensures the visibility of labels
-  Maintains a sterile field
-  Eliminates exposure to glass shards when opening ampule
